1.0 Project Summary

1.1 Project Description
The Tampa Hillsborough Expressway Authority (THEA), in coordination with the City of Tampa, is conducting a Project Development and Environment (PD&E) Study to evaluate the needs, costs, and effects of extending Whiting Street and reconfiguring the on-ramps of the Selmon Expressway at Jefferson Street and off-ramps at Florida Avenue and Channelside Drive. The study considers extending Whiting Street to North Meridian Avenue and includes improvements and realignment of the existing segment of Whiting Street, from Jefferson Street to North Brush Street. The extension will provide a direct connection of the Whiting Street corridor to North Meridian Avenue which will improve traffic flow and safety for all transportation modes and offer additional connections within the street network.

The study will also evaluate reconfiguring the on-ramp to the Selmon Expressway at Jefferson Street and the off-ramps at Florida Avenue and Channelside Drive. It is anticipated that the Florida Avenue off-ramp will be widened to two lanes, the Channelside Drive off-ramp will be removed, and the new Whiting Street off-ramp will extend from the Selmon Expressway, near Morgan Street, to Nebraska Avenue and intersect with the new Whiting Street alignment to provide a direct connection from the Selmon Expressway. See Figure 1.1 for the project location map.
1.2 Project Purpose & Need

The purpose of this project is to provide a direct connection of the Whiting Street corridor to North Meridian Avenue to improve traffic flow and safety for all transportation modes and offer additional connections within the street network. The project will also reconfigure the on-ramps to the Selmon Expressway at Jefferson Street and the off-ramps at Florida Avenue and Channelside Drive to improve safety, traffic circulation, and access to Whiting Street and North Meridian Avenue.

The need for the project is based on the following criteria:

System Linkage

Based upon the Tampa Bay Regional Planning Model (TBRPM) Version 8.2, the existing roadway network will be over capacity by the 2046 design year. Additional network connectivity such as the Whiting Street extension and ramp reconfigurations, are necessary to provide additional route choice and access to alleviate the congestion.

Safety

Safety and operational concerns with the Florida Avenue and Channelside Drive off-ramps include a substandard radius and a free-flow merge movement onto Florida Avenue with a sidewalk/crosswalk conflict. The ramp termini onto Channelside Drive terminates into a 5-leg intersection at Channelside Drive and Morgan Street, which is a major pedestrian access point to the Amalie Arena. Six (6) years of data (2013-2018) were reviewed, and 14 crashes have occurred at this ramp. As the Water Street Project builds out to the east of the ramp system, the adverse impact of geometric issues and pedestrian conflicts are expected to be exacerbated. Also, the planned widening of the Selmon Expressway south of the downtown ramps will alleviate congestion issues and result in higher speed, higher volume interactions at this ramp. As such, improving the ramp geometry, eliminating pedestrian conflicts, and redirecting Downtown east traffic beyond the Water Street District is critical to proactively address safety concerns as both the Selmon Expressway and Downtown Tampa continue to develop.

Transportation Demand

Based upon the Tampa Bay Regional Planning Model (TBRPM) Version 8.2, Jefferson Street (39,000 AADT) and Kennedy Boulevard (34,000 AADT) are expected to reach their operational capacity by 2040. As the Water Street Project develops, the vehicle demand is expected to increase. The proposed connection of Whiting Street could carry up to 14,800 AADT, providing valuable route divergence and congestion relief to the parallel facilities.

1.3 Preferred Alternative

THEA has committed to provide a new connection to Meridian Avenue, by extending Whiting Street between Meridian Avenue and Brush Street. In order to construct the extension of Whiting Street, the existing railroad tracks will need to be removed. Removing the railroad tracks and completing the extension to Meridian Avenue will offer an additional connection within the street network, providing additional route choice and alleviating congestion.

The preferred alternative proposes improvements to existing ramp configurations and the existing street network at multiple locations in the Downtown/Channelside area. The improvements can be broken up into four distinct locations. See Figure 1.2 for each location of proposed improvements.
Location A

Whiting Street currently ends at Brush Street, west of the railroad tracks. The preferred alternative proposes to extend Whiting Street, from Brush Street to Meridian Avenue, with a new signal at the T-intersection of Whiting Street and Meridian Avenue. The preferred alternative proposes to extend Whiting Street, from Brush Street to Meridian Avenue, with a new signal at the T-intersection of Whiting Street and Meridian Avenue. The proposed typical section for the Whiting Street extension includes two 11-foot wide travel lanes in each direction, a 15-foot wide raised median, curb and gutter, and 10-foot wide sidewalks on both the north and south sides of the road. The eastbound approach to Meridian Avenue includes two 11-foot wide dedicated left turn lanes and one 11-foot wide dedicated right turn lane. If necessary, the proposed 15-foot wide raised median can be converted to an additional dedicated left turn lane. The existing grassed median on Meridian Avenue will be split in order to accommodate the proposed signalized intersection. The preferred alternative includes the addition of a southbound dedicated right turn lane and a northbound dedicated left turn lane. The preferred alternative does not propose any other improvements to Meridian Avenue.

Location B

Whiting Street is currently a two-lane roadway with on-street parking on both the north and south sides of the road. East of the Selmon Expressway, Whiting Street is a brick road in much need of repair. The preferred alternative proposes to widen/reconstruct Whiting Street from two to four lanes with two 11-foot wide travel lanes in each direction, curb and gutter, and 10-foot wide sidewalks on both the north and south sides of the road. The preferred alternative also includes installing two new traffic signals; one at the intersection of Whiting Street and the terminus of the proposed Whiting off-ramp, just east of the Selmon Expressway.
Expressway, and the other at the intersection of Whiting Street and Brush Street. A dedicated eastbound left turn lane is proposed at the intersection of Whiting Street and Brush Street.

Location C

The existing exit ramp 6B provides users the ability to travel east along Channelside Drive, towards Amalie Arena and the Florida Aquarium. The preferred alternative proposes relocating exit ramp 6B approximately 700 feet north and providing a direct connection to Whiting Street. The proposed ramp includes a single 15-foot wide ramp lane, which will remain on structure beyond the existing Jefferson Street on ramp. From this point the ramp profile begins to decrease and the ramp will be supported by Mechanically Stabilized Earth (MSE) wall, which ends approximately 100 feet south of Whiting Street. The ramp widens to three 12-foot wide lanes at the intersection, with one dedicated left turn lane and two dedicated right turn lanes. The proposed ramp will cut off access north, along Nebraska Avenue, and therefore requires a horizontal curve to connect Nebraska Avenue to Finley Street. The existing Jefferson Street on ramp entrance will be shifted to the north to accommodate the new Whiting Street off-ramp.

Location D

The current configuration of exit ramp 6A includes a tight single lane loop ramp that merges onto Florida Avenue under a free-flow condition. The short, tight curve provides little room for vehicles to slow down and queue if there is any backup when trying to merge onto Florida Avenue. The preferred alternative proposes widening the ramp from one to two lanes as well as lengthening the ramp to provide a wider curve. The loop ramp terminates at Florida Avenue at a proposed signalized intersection. The proposed loop ramp includes two 12-foot wide ramp lanes and will remain on structure beyond the existing exit ramp 6B to provide an open area underneath for mixed use and to promote pedestrian travel. Approximately 300 feet north of Florida Avenue, the ramp widens to three lanes to provide more vehicle storage and efficient queue dispersion onto Florida Avenue. The increased ramp length as well as the additional lanes will minimize backup and potential vehicle queueing onto the Selmon Expressway. The preferred alternative includes a 10-foot wide sidewalk on the inside edge of the proposed loop ramp, crossing underneath the ramp at the location of the existing exit ramp 6B. Pedestrians will have the ability to cross the loop ramp, to access Channelside Drive, at a proposed crosswalk. No right of way is required to construct the proposed loop ramp.
2.0 Utility Information

2.1 General
The intent of this report is to furnish pertinent information concerning the location, size and characteristics of major utilities found within the proposed study limits (see Figure 1.1).

2.2 Utility Coordination
The preliminary utility coordination and investigation effort was conducted through written and verbal communications with the existing utility owners. A Sunshine State 811 of Florida Design Ticket System listing of existing utility owners was acquired on February 16, 2021 (see Appendix B).

Initially, verbal communication was made to all utilities owners outlining the investigation effort along with the project limits. The list of utility agencies owners (UAO) known to operate utilities within the project corridor are shown below.

Utility owners were provided aerial based preliminary plans depicting the proposed Whiting Street corridor improvements. Using these aerial plans as a base map, each utility owner was asked to indicate their existing and proposed utilities as well as any easements that may affect their reimbursement rights for potential relocations of their facilities. In response, not all utility owners replied via written communications. The utility owners that did provide the requested information concerning their facilities used either the preliminary plans provided or reference documentation (i.e. “As-builts” or GIS maps). “Marked” plans or reference documentation was received from the below Utility Agency Owners.
3.0 Utility Existing Facilities Descriptions

3.1 AT&T Corp.
Non-responsive.

3.2 City of Tampa Water
The City of Tampa (City) owns and maintains an 8” Cast Iron (Enamel) water main (WM) that runs north and south along Florida Avenue. This pipe contains joints installed before modern day rubber gaskets were used. Therefore, it does not bend well and care should be taken to not disturb or vibrate them during construction.

There is an 8” Ductile Iron Pipe (DIP) that runs east and west along Channelside Drive that crosses the 8” cast iron pipe. The portion of this 8” pipe that extends east along Channelside Drive serves a fire hydrant in front of the Pam Iorio public parking garage and terminates just east of the hydrant where the city installed a reducer (plug).

There is a 6” WM (service line) that crosses Channelside Drive located approximately 120 feet west of Florida Avenue. This 6” WM serves the irrigation system of the public Parkway Parking lot on the northside of Channelside Drive.

The City has a 6” WM along Florida Avenue south of Channelside Drive that has been placed out of service. The City has a 12” WM with valves and manholes located down the center of Jefferson Street at Whiting Street. The City has an 8” DIP that runs east and west along Whiting Street and turns and continues along Brush Street. The City also has a 12” DIP that runs north and south along Nebraska Avenue, turns east along Whiting Street, then turns north along the center of Brush Avenue. They have a 6” WM that runs along Finley Street on the southside, and a 6” WM that runs along Walton Street on the northside. There are multiple valves and manholes (MH) throughout this area that will need to be adjusted to grade during construction. The city did not provide a utility cost estimate for relocations (see Appendix A).

3.3 City of Tampa Wastewater
City of Tampa Wastewater owns and maintains a 36-inch reinforced concrete pipe (RCP) along S. Florida Avenue, a 24” PolyVinyl Chloride (PC) along Channelside Drive, and a 10” Vitrified Clay Pipe (VCP) to the west of Florida Avenue. They have an 8” VCP along E. Kennedy Boulevard, E. Jackson Street, and E. Whiting Street. They also have a 24” VCP that runs along S. Morgan Street on the westside. The city did not provide a utility cost estimate for relocations (see Appendix A).

3.4 City of Tampa Traffic
Non-responsive

3.5 Crown Castle
Non-responsive
3.6 Cumberland Jefferson Properties
Cumberland Jefferson Properties did provide a mark-up, but their facilities do not appear to be within the project limits (see Appendix A).

3.7 Extent Network Operations
Non-responsive

3.8 Fiberlight
Non-responsive

3.9 Frontier
Non-responsive

3.10 Hillsborough County
Non-responsive

3.11 Hillsborough County Sheriff’s Office
Non-responsive

3.12 Lumen fka CenturyLink
Lumaen fka CenturyLink has Fiber Optic Cable (FOC) within Tampa Electric Underground facilities along the southside of Channelside Drive (see Appendix A). Lumen fka CenturyLink did not provide a utility cost estimate.

3.13 Spectrum\Charter fka Bright House Networks
Non-responsive

3.14 T-Mobile fka Sprint
T-Mobile fka Sprint has facilities along the railroad on the westside and turns to the west along the northside of Whiting Street where it turns and goes north on Tampa City Circle. T-Mobile did not provide a cost-estimate for relocations (see Appendix A)

3.15 Tampa Electric Company
Non-responsive
3.16 Tampa-Hillsborough Expressway Authority
Tampa-Hillsborough Expressway Authority has single mode fiber, some are 12 and 6 count, and the backbone is 96 count fiber. Communication cables are 24 gauge, and some are CAT (Category) 5 cable. Power maybe 6 or 8 KWG. There was not a utility estimate for relocations received (see Appendix A).

3.17 Tampa Port Authority
Received NO FACILITIES e-mail from Imeal Arroyo on September 13, 2021 (see Appendix A).

3.18 TECO Peoples Gas
TECO Peoples Gas has a 2” polyethylene (PE) gas main (GM) along the northside of Channelside Drive, a 4” coated steel (CS) GM along the westside of Morgan Street, and a 4” PE GM along the westside of Florida Avenue, south of Channelside Drive.

TECO Peoples Gas has a 4” CS GM that runs north and south along Nebraska Avenue, crosses Whiting Street and continues north along the east right-of-way of the Selmon Expressway. There is also a 350-foot section of 4” PE GM along Nebraska Avenue, north and south of Walton Street, that has been retired in place (see Appendix A).

3.19 Uniti Fiber
Uniti Fiber has a 1 x 2.33” - 7 way future path with fiber optic cable (FOC) to remain in place along the westside of Florida Avenue that turns west along the southside of Channelside Drive.

Uniti Fiber has a 1 x 2.33” - 7 way future path with FOC along the westside of Brush Street, crosses Whiting Street and turns west and terminates at a small cell node pole on the southside of Whiting Street (see Appendix A).

3.20 Verizon fka MCI
Verizon has both aerial and underground facilities throughout the project limits. They are aerial on the existing the Tampa Electric Company pole line along Washington Street. Along Nebraska Avenue just to the north of Whiting Street, on the eastside, they have 2-2” HDPE conduits with FOC. Along the eastside of Florida Avenue they have 2-2” HDPE conduits with FOC, then they turn and go east on the northside of Channelside Drive. Verizon did not provide a utility cost estimate for relocations (see Appendix A).

3.21 Windstream fka Deltacom
Windstream fka Deltacom is not within the limits of this project (see Appendix A).

3.22 Zayo
The Zayo Group does not have any existing facilities within the proposed project limits; therefore, they are not involved with this project. Received e-mail from John Burlett on March 9, 2021 (see Appendix A).

Locat: DESIGN BEGINS FROM THE NORTH SIDE OF THE INTERSECTION OF N MERIDIAN AVE & E TWIGGS ST, GOING SOUTH FROM ROW TO ROW ON BOTH SIDES OF THE ROAD UNDER PAVEMENT TO E CUMBERLAND AVE FOR A TOTAL APPROX DISTANCE OF .53 MI:

Remarks: DESIGN ONLY, NO LOCATES
IN RESPONSE TO RECEIPT OF A DESIGN TICKET, SSOCOF PROVIDES THE ORIGINATOR OF THE DESIGN TICKET WITH A LIST OF SSOCOF MEMBERS IN THE VICINITY OF THE DESIGN PROJECT. SSOCOF DOES NOT NOTIFY SSOCOF MEMBERS OF THE RECEIPT BY SSOCOF OF A DESIGN TICKET. IT IS THE SOLE RESPONSIBILITY OF THE DESIGN ENGINEER TO CONTACT SSOCOF MEMBERS TO REQUEST INFORMATION ABOUT THE LOCATION OF SSOCOF MEMBERS' UNDERGROUND FACILITIES. SUBMISSION OF A DESIGN TICKET WILL NOT SATISFY THE REQUIREMENT OF CHAPTER 556, FLORIDA STATUTES, TO NOTIFY SSOCOF OF AN INTENT TO EXCAVATE OR DEMOLISH. THAT INTENT MUST BE MADE KNOWN SPECIFICALLY TO SSOCOF IN THE MANNER REQUIRED BY LAW. IN AN EFFORT TO SAVE TIME ON FUTURE CALLS, SAVE YOUR DESIGN TICKET NUMBER IF YOU INTEND TO BEGIN EXCAVATION WITHIN 90 DAYS OF YOUR DESIGN REQUEST. THE DESIGN TICKET CAN BE REFERENCED, AND THE INFORMATION ON IT CAN BE USED TO SAVE TIME WHEN YOU CALL IN THE EXCAVATION REQUEST.

Locat: DESIGN BEGINS FROM THE INTERSECTION OF S NEBRASKA AVE & E WHITING ST, GOING SOUTH FROM ROW TO ROW ON BOTH SIDES OF THE ROAD TO E CUMBERLAND AVE FOR A TOTAL APPROX DISTANCE OF 863 FT

Remarks : DESIGN ONLY, NO LOCATES
IN RESPONSE TO RECEIPT OF A DESIGN TICKET, SSOCOF PROVIDES THE ORIGINATOR OF THE DESIGN TICKET WITH A LIST OF SSOCOF MEMBERS IN THE VICINITY OF THE DESIGN PROJECT. SSOCOF DOES NOT NOTIFY SSOCOF MEMBERS OF THE RECEIPT BY SSOCOF OF A DESIGN TICKET. IT IS THE SOLE RESPONSIBILITY OF THE DESIGN ENGINEER TO CONTACT SSOCOF MEMBERS TO REQUEST INFORMATION ABOUT THE LOCATION OF SSOCOF MEMBERS' UNDERGROUND FACILITIES. SUBMISSION OF A DESIGN TICKET WILL NOT SATISFY THE REQUIREMENT OF CHAPTER 556, FLORIDA STATUTES, TO NOTIFY SSOCOF OF AN INTENT TO EXCAVATE OR DEMOLISH. THAT INTENT MUST BE MADE KNOWN SPECIFICALLY TO SSOCOF IN THE MANNER REQUIRED BY LAW. IN AN EFFORT TO SAVE TIME ON FUTURE CALLS, SAVE YOUR DESIGN TICKET NUMBER IF YOU INTEND TO BEGIN EXCAVATION WITHIN 90 DAYS OF YOUR DESIGN REQUEST. THE DESIGN TICKET CAN BE REFERENCED, AND THE INFORMATION ON IT CAN BE USED TO SAVE TIME WHEN YOU CALL IN THE EXCAVATION REQUEST.

02/16/2021 5:56:52 PM  TAMP04  HAS DECLARED EXTRAORDINARY CIRCUMSTANCES

*** LOOKUP BY MANUAL ***
